

PMP certification preparation

You can achieve it!

Why preparing PMP[®] certification?

PMP certification is the most famous certification in project management in the world. It is delivered by PMI (Project management Institute) which is an international organization delivering standards and best practice in project management.

There are more than 600 000 PMP certified project managers in the world and this certification is **internationally recognized**.

What are the pre-requisite to prepare the exam?

- 35 hours project management training (35 PDU) delivered by an agreed provider (REP) by PMI
- Professional experience leading project 4500 hours (3 years) for four-year degree or 7500 hours (5 years) for secondary degree.

What about the application and exam cost?

The cost for application and exam is US\$555/participant. More details on www.pmi.org AchievUp advises to subscribe to become a PMI member (US\$129) to reduce registration cost (US\$405) and be allowed to download PMBOK pdf. This cost is not included in the training package of AchievUp.

Why AchievUp to prepare PMP certification?

AchievUp wants to **give best chances to individuals** (independent workers or individual funding themselves) to pass the exam thanks to an **optimum preparation with coaching at reasonable cost.**

This packages includes as well a free access to the [intrinsic leadership program](#).

This represents an alternative to classroom trainings (more expensive) and to e-learning trainings (lack of interactions). This idea came from [my own experience to prepare PgMP certification](#) for which coaching was necessary me to be fully prepared.

The training system is built through partnership with a well-known Indian trainer who is affiliate with an e-learning partner which is registered by PMI as a Registered Education Provider.

The proposed PMP Journey to pass the exam

About 150-200 hours effort to pass the exam (about 15-20 weeks)

Stage #1: Acquire knowledge
